

TSCF—X · INTERNATIONAL BUYER BRIEF

Verified Ghanaian commodity. *Farm-to-vessel discipline.*

Every shipment your supplier sends through the TSCF—X programme travels under a documented verification stack from smallholder farmer to vessel departure. PSI-certified by SGS or Bureau Veritas. Bill of lading consigned to the Finance Partner. Full traceability to source village and aggregator hub. Below is the structure that sits behind your supplier's offer.

VERIFICATION STACK · FARMER TO VESSEL

1	Source farmer registration FARMERIQ	10,000+ smallholder farmers across Northern Ghana registered in FarmerIQ. Each farmer linked to commodity, village, payment history. Traceability evidence available per shipment for EUDR compliance and ethical sourcing reporting.
2	Hub verification & weighing TRADEPOINT	Six commodity verification hubs across Northern Ghana with calibrated weighbridges, quality grading, and field-officer supervised loading. Three-point weight verification: hub scale, weighbridge, destination reconciliation.
3	Pre-shipment inspection SGS OR BUREAU VERITAS	Mandatory PSI by SGS or Bureau Veritas on every TSCF—X shipment before container seal. Inspector certificate issued directly to the Finance Partner. Container seal numbers recorded against the Trade ID.
4	Inland haulage tracking TRACKGUARD	GPS logistics monitoring from TradePoint hub to Tema port CFS. Geofence alerts on route deviation. Full route history retained. Marine cargo insurance active from loading point with the Finance Partner's escrow as loss payee.
5	Bank-consigned bill of lading FINANCE PARTNER	BL consigned to the Finance Partner, not to the exporter and not to the buyer. BL release conditional on bank confirmation of buyer payment under Letter of Credit or Documentary Collection. Goods do not release at destination port without bank-confirmed settlement.
6	Documentation package FORWARDER + MIZIBA	Full export documentation: BL, Certificate of Origin, packing list, phytosanitary certificate, PSI inspector certificate, customs declarations. Issued together to your bank's documentary collection or LC negotiation desk.

WHY THIS MATTERS TO YOUR PROCUREMENT

“

You are buying verified commodity, not a supplier's promise. Every kilogram in the container has been weighed at a calibrated hub, quality-certified by trained field officers, PSI-inspected by SGS or Bureau Veritas, and tracked through transit. The bill of lading is held by the bank until you settle.

TSCF—X · OPERATIONAL TRACK RECORD

Six hubs. *Six commodities.* Zero defaults.

The verification stack is not aspirational. It runs on operational infrastructure that has aggregated commodity at GHS 102M+ scale in the most recent fiscal year, with zero loan default history across all banking relationships. Below are the operational proof points relevant to your supplier diligence.

10,000+

REGISTERED FARMERS

FarmerIQ database covering 150+ villages across six regions of Northern Ghana. Source-village traceability available per shipment for EUDR compliance.

98.5%

FARMER PAYMENT SLA

Farmers paid via mobile money within two hours of commodity verification at the hub. Payment timestamps logged against Trade ID for audit.

GHS 102M+

FY2025 COMMODITY VOLUME

Anchor aggregator JNI AGRI Trading audited revenue. Six-year operating record across cashew, shea, sesame, sorghum, soya value chains.

0

LOAN DEFAULT HISTORY

Zero defaults across all banking relationships since 2019. Verifiable via bank confirmation letters from JNI AGRI's lenders.

6

TRADEPOINT VERIFICATION HUBS

Bole, Kintampo, Wenchi, Techiman, Tamale, Zabzugu. Calibrated weighbridges. Field-officer supervised loading. Sealed sample retention.

9

PROTECTION LAYERS

Seven shared with TSCF—D plus Controlled Custody (Layer 8) and Bill of Lading Control (Layer 9) — export-only structural controls.

Commodity coverage. *Corridor diversity.*

Commodities: cashew, shea, sesame, sorghum, soya, with cocoa under preparation. **Sourcing regions:** Northern, Savannah, North East, Upper East, Upper West, Brong-Ahafo. **Export corridors:** India, Vietnam, China, EU, North America. Every shipment documented with origin hub, farmer group, weighbridge certificate, PSI certificate, and full export documentation package.

Supplier validation *questions?*

Your supplier's Miziba contact can answer technical questions about verification, PSI scheduling, BL terms, or documentation requirements.
